

IN THE ABSTRACT:

Please amend the Abstract to read as shown below.

B1
"A method of using a dry ice blasting system to clean injection molds in and out of injection molding machines characterized in that it is easy to use and is particularly well suited to cleaning small mold features such as the vents on molding inserts."

IN THE SPECIFICATION:

Please amend the specification to read as shown in the attached Substitute Specification. A mark-up version of the Substitute Specification is enclosed for the Examiner's convenience, showing the portions deleted from the Specification and the portions added to the Specification.

IN THE CLAIMS:

Please cancel Claims 1-23 without prejudice to or disclaimer of the subject matter therein.

Please add new Claims 24-30 as follows:

Subcl B2
1/22
--24. (Newly Added) A method for the cleaning of an injection mold comprising the steps of:

1/22
configuring the operating controls of a dry ice blasting system to produce a cleaner flow comprising dry ice granules entrained in a gas with the dry ice granules ranging in size from approximately 0.005 to 0.040 inches in diameter, at a gas-to-dry ice
